Anti-Trust Statement for Stairbuilders and Manufacturers Association Meetings

The Stairbuilders and Manufacturers Association has adopted antitrust compliance guidelines for all SMA meetings. These guidelines have been adopted for the protection of the members, and of the SMA, so that none of us will be accused of violations of antitrust laws. There can be no discussions or agreements among competitors, which would restrain, or attempt to restrain, competition in the open markets. Specific topics, which should not be discussed at SMA meetings or functions, include, among other things, current or future prices, stabilization of markets, and fair profit levels.
